ALLPUM Cable Tie

UV-Resistant Cable Ties

Cable tie E525872 Compliant with UL Standard – UV Light Resistance Tested

Specialized Manufacturer of Cable Ties

- | Manufactured with High-Quality Raw Materials
- | Flexible and Strong Even in Cold Weather
- | Excellent Resistance to UV Exposure
- | Free from Harmful Substances

Committed to Customer Safety and the Right Quality, We Will Continue to Uphold the Philosophy of the ALLPUM Brand

Suryong Industrial has grown by establishing stable production technology and a strict quality management system based on accumulated experience and mold development capabilities in the cable tie manufacturing industry.

The standard we value most has always remained the same: quality that customers can trust with confidence and consistency that remains reliable even in repeated mass production.

Korea has four distinct seasons and a wide variety of usage environments. Reflecting these characteristics in product design and manufacturing processes, Suryong Industrial has continuously advanced its manufacturing technology. As a result, we introduced ALLPUM, a cable tie brand designed to perform reliably in the Korean environment.

ALLPUM cable ties have obtained UL certification in accordance with U.S. safety standards, demonstrating verified product safety and reliability.

All of these achievements have been made possible thanks to the trust and support of our valued customers. We sincerely appreciate your continued confidence in Suryong Industrial.

Moving forward, Suryong Industrial will continue to pursue technological innovation and quality improvement. By continuously investing in product development and quality systems, we will respond more quickly and accurately to the diverse needs of our customers and strive to become a trusted partner delivering value beyond expectations.

CEO Tae-Young Han
Suryong Industrial Co., Ltd.

Our History

- 2025**
 - Nov – Export Department Established
 - Oct – R&D Center Established
 - Mar – Push Connector (Lever Type) Launched
- 2024**
 - Nov – ISO 9001 / 14001 / 45001 Certified
 - Jun – Gwangju Plant Relocated & Expanded
 - Jun – INNOBIZ Certification
 - Mar – Utility Model Registered (Cable Tie)
- 2023**
 - Jan – Investment Agreement with Gwangju FEZ
 - Sep – Korea International Trade Association Member
 - May – Incorporated as Suryong Industrial Co., Ltd.
 - Mar – UL Certification Acquired
- 2022**
 - Jul – ISO 9001 Certification
 - May – Fishery Cable Tie Utility Model Registered
 - Jan – Selected for Export Support Program (2021–2022)
- 2021**
 - Mar – Selected as Technology Competence Company
 - Feb – Cable Tie Design & Utility Model Registered
- 2014~**
 - Dec 2020 – ALLPUM Trademark Registered
 - Nov 2019 – Cable Tie Manufacturing Plant Established
 - Jan 2014 – Company Founded

Test Condition	Temp. °C:	RH%:	Date:	Time:	Technician:
Resistance to Ultraviolet Light	23	52	2023-02-16	8:05 AM	V.C.

What is a Weather Resistance Test?

The UL safety certification system for cable ties verifies product performance according to UL standards, including specified tensile strength and resistance to UV (ultraviolet) exposure.

Under controlled test conditions, products are subjected to cyclic temperature changes between high temperature (85°C) and low temperature (-40°C) over a fixed period (1,000 hours, approximately two months). Tensile strength is then evaluated to confirm product compliance and ensure reliable quality performance.

Through verification of resistance to ultraviolet (UV) exposure, the product demonstrates strong weather resistance and reliable performance in outdoor installation environments.

Quality Assurance System

Daily Quality Verification Test

Appearance Inspection

Insertion Test

Bending Test

Tensile Strength Test

To ensure reliable product quality, daily inspections are conducted throughout the manufacturing process.

*** Appearance Inspection**

Inspection to prevent defects such as molding defects, burrs, or missing parts that may affect user operation.

*** Insertion Test**

Inspection to verify smooth insertion and reduce user fatigue during installation.

*** Bending Test**

Inspection to prevent breakage during product use.

*** Tensile Strength Test**

Inspection to verify tensile strength according to specified standards and ensure suitability for user environments.

Reliability Test

Product reliability is verified through periodic testing under conditions reflecting actual user environments.

Locking Test

Low Temperature Test

Real Use Locking Test

Weather Resistance Test

*** Locking Test**

Inspection to verify tensile strength and locking stability under conditions simulating actual user environments.

*** Environmental Test**

Inspection to verify product reliability under extreme temperature conditions over a defined period.

Production

01. Only Virgin Raw Materials Used

- * Material : Nylon 66 – Polyamide
- * Flammability : UL 94 V-2
- * Raw Material Origin : USA

02. Mold & Manufacturing Expertise

- * Over 35 Years of Mold Engineering Experience
- * 25 Years of Precision Injection Molding Expertise

03. Manufacturing Technology Adapted to Four Seasons

- * Durability Designed for Korean Climate Conditions
- * Korean-Standard Cable Tie Production
- * Quality Management System

04. Global Standards & Product Certification

- * UL Safety Certification (USA)
- * UV Resistance Test Approved
- * RoHS Certification

05. Daily Quality Performance Testing

- * Daily Performance Testing
- * Appearance, Bending, and Low Temperature Tests
- * Insertion Force and Tensile Strength Tests

06. Korean Manufacturing Technology

- * Developed with Korean Technology
- * Manufactured in Korea
- * Customer Support Service

Flame Retardant Cable Tie (In Development)

Notes

1. Material: Nylon 66 (UL94 V-0)
AP Series: Available in all colors, suitable for indoor and outdoor use
2. Operating Temperature: -40°C to 85°C
3. Application: For flame-retardant environments (high fire resistance)
Suitable for control panels, communication equipment, data centers, and building facilities

Model	Length(mm)	Width(mm)	Thick(mm)	Tensile(N)	Qty / Bag
AP100	100	2.5	1.0	80	1,000
AP140	140	3.6	1.1	134	1,000
AP200	200	4.8	1.3	220	1,000
AP270	270	6.0	1.4	356	500
AP300	300	4.8	1.3	220	500

Heat Resistant Cable Tie (In Development)

Notes

1. Material: Nylon 66 (UL94 V-2)
AP Series: Available in all colors, suitable for indoor and outdoor use
2. Operating Temperature: Up to 115°C
3. Application: For high-temperature environments (heat resistant)
Suitable for automotive engine compartments, industrial machinery, power plants, and solar systems

Model	Length(mm)	Width(mm)	Thick(mm)	Tensile(N)	Qty / Bag
AP100	100	2.5	1.0	80	1,000

* ALLPUM Cable Ties

ALLPUM cable ties are tested under strict UL certification standards, ensuring reliable tensile strength and heat resistance. They maintain stable fastening performance even in extreme temperature conditions and offer excellent durability in outdoor environments with proven UV resistance.

Wire Connector PVC

Notes

1. Material: Body – Non-toxic PVC (V-0 flame retardant)
Screw – Steel wire
2. Colors: Yellow, Red, Blue, Gray
3. Packaging: 100 pcs per bag / 4,000 pcs per carton
4. Performance: Electrical connector for wire connection and insulation protection
5. Origin: Made in Korea (In-house production)

Lever Push Connector

Notes

1. Material: Polycarbonate (PC)
Lever – Polyoxymethylene (POM)
Cover – Glow Wire Test: 850°C
2. Operating Temperature: -40°C to +105°C
3. Rating: 450V / 32A
4. Certification: CE
5. Features: Lever type for easy connection and disconnection, reusable for maintenance

Type	APCMK-632	APCMK-633	APCMK-634	APCMK-635
No.	2p	3p	4p	5p
Qty / Bag (pcs)	100	100	100	50
Bags / Carton	10	8	8	8
Color	Transparent (Body) & Orange (Lever)			
Material	PC			
Voltage	450V / 32A			
Strip Length (mm)	11mm / 0.43 inch			
Wire Range (AWG/SQ)	'24-12 / 0.2-4			

* Lever Connector vs Push-in Connector

Push-in connectors allow quick wiring by simply inserting the wire, making them suitable for fast and simple installations. Once connected, removal is difficult, so they are mainly used for fixed wiring where disconnection is not required. Lever connectors use a lever mechanism to open, insert the wire, and close for secure connection. They allow easy connection and disconnection, making them ideal for maintenance, frequent wiring changes, and applications requiring connection of different wire sizes.

Mini Push Connector

Notes

1. Material: PC (UL94 V-2)
2. Temperature: IEC T85 / UL 105°C
3. Rating: 450V / 24A
4. Certification: UL / CE / CQC
5. Features: Compact design for tight spaces, suitable for lighting and building wiring, smaller than standard push-in connectors (refer to size)

Material	PC			
Voltage	450V / 24A			
Temperature	IEC: T85°C / UL: 105°C			
Strip Length (mm)	11mm / 0.43inch.			
Wire Range (AWG/SQ)	24-12 / 0.2~2.5			

* IEC vs UL Temperature Rating

IEC T85°C indicates that the product is suitable for use in ambient temperatures up to 85°C. UL 105°C means the product has been tested and certified to operate safely in environments up to 105°C. For safe use, ensure that the installation environment does not exceed the specified temperature rating.

Push Connector Type 1

Notes

1. Material: PC (UL94 V-2)
2. Temperature: IEC T85 / UL 105°C
3. Rating: 450V / 24A
4. Certification: UL / CE / CQC
5. Features: Fast and reliable wiring, suitable for electrical and lighting installation

Voltage	450V / 24A				
Temperature	110°C				
Strip Length (mm)	13 mm				
Wire Range (AWG/SQ)	20-14 AWG / 0.5-2.5 mm ²				

* Wire Range: AWG vs SQ

Wire range (AWG/SQ) indicates the size range of wires that a connector or terminal can accommodate. AWG is a standard mainly used in the United States, where a smaller number means a thicker wire. SQ refers to the cross-sectional area of the wire in mm², representing the actual wire size. For safe and reliable electrical connections, use wires within the specified range

Push Connector Type 2

Notes

1. Material: PP + PC (UL94 V-2)
2. Temperature: 105°C
3. Rating: 400V / 23A-41A
4. Certification: UL / CE
5. Features: Push-in design for thick wire connection, stable connection for electrical and equipment wiring

Strip Length (mm)	13mm		
Wire Range (AWG/SQ)	0.75 - 4.0 / 18 - 12		2.5 - 6.0 / -

* Strip Length(mm)

Strip Length (mm) refers to the length of insulation that must be removed from the wire for proper connection to the connector. Stripping the wire to the specified length ensures accurate contact with the conductor and a stable electrical connection. If stripped too short, the connection may be incomplete; if too long, exposed conductors may cause safety issues.

Closed End Connector

Notes

1. Material: PE
2. Color: Natural (White)
3. Application: Wire connection and insulation protection

ALLPUM Cable Clamp

Cable clamps are fastening components designed to secure wires and cables to structures, preventing movement or vibration.

They are installed on walls or equipment using screws to hold cables firmly in place, helping with cable management and ensuring safe electrical installations.

Widely used in electrical wiring, telecommunications systems, automotive wiring, and various industrial applications.

* Cable Clamp Applications

* Terminal Cap

A terminal cap is an insulating component used to safely cover the end of a wire, protecting exposed conductors and preventing electrical contact.

It is applied to the cut end of wires after wiring work is completed, helping to protect against external impact and moisture while reducing the risk of electric shock and short circuits.

Stainless Steel Cable Tie

Stainless steel cable ties are metal fastening products with superior heat resistance, corrosion resistance, and durability compared to standard nylon cable ties.

They are designed to securely fix cables and equipment even in harsh environments such as high temperatures, chemical exposure, and outdoor installations.

Widely used in plants, ship-building, power generation facilities, offshore structures, and various industrial applications.

APCMK-632 (2p)	Transparent (Body) & Orange (Lever)	10	20
APCMK-633 (3p)		10	20
APCMK-634 (4p)		10	20
APCMK-635 (5p)		10	20

Mini Push-in Connector

Model	Color	Qty / Bag	Bags / Carton
APPC-212U (2p)	Red	25	20
APPC-213U (3p)	Orange	25	20
APPC-214U (4p)	Yellow	25	20
APPC-215U (5p)	Gray	25	20

Push-in Connector Type 1

Model	Color	Qty / Bag	Bags / Carton
APP01-22 (2p)	Red	25	20
APP01-32 (3p)	Orange	25	20
APP01-42 (4p)	Yellow	25	20
APP01-52 (5p)	Gray	25	20
APP01-82 (8p)	Black	25	20

Push-in Connector Type 2

Model	Color	Qty / Bag	Bags / Carton
APP01-i2	Transparent (Body) & Red (Lever)	25	20
APP01-i4		25	20
APP01-X3		25	20

Reusable Twist Tie

Model	Color	Qty / Bag	Bags / Carton
APTTU-11	White	50	20

Cable Tie Mount

Model	Tie Width	Qty / Bag	Bags / Carton
APTM-2S	2.5~4.8	25	20
APTM-3S	4.8~7.6	25	20

Adhesive Cable Tie Mount

Model	Tie Width	Qty / Bag	Bags / Carton
APTM-19	3.6	25	20
APTM-25	4.8	25	20

Cable Clamp

Model	Inner Diameter	Qty / Bag	Bags / Carton
APCC0-2N	2.8	50	20
APCC0-3N	4.6	50	20
APCC0-4N	5.6	50	20
APCC0-5N	7.4	50	20
APCC0-6N	10.0	50	20
APCC0-7N	10.7	50	20
APCC0-8N	11.9	25	20
APCC0-9N	13.5	25	20
APCC0-10N	14.0	25	20

Terminal Cap

Model	Size / Color	Qty / Bag	Bags / Carton
Terminal Cap	1.5 (R)	50	20
	1.5 (B)		
	1.5 (Y)		
	1.5 (G)		
	1.5 (W)
